

# Bike & Ride with Sun Tran

**1. Make Yourself Visible:** As the bus approaches, stand in a clear and visible spot where the driver can see you. Wait until the bus has completely stopped before approaching the bike rack.

**2. Notify the Driver:** Once the bus has stopped, make sure to signal or clearly communicate with the driver that you intend to use the bike rack.

**3. Lower the Rack Safely:** Squeeze the handle on top of the bike rack to lower it, making sure the driver is aware of your actions to avoid any surprises.

**4. Load Your Bike:** Lift your bike and place it on the rack in the designated wheel slots closest to the bus. If there is already a bike on the rack, load yours facing the opposite direction to make efficient use of space.

**5. Secure Your Bike:** Once your bike is loaded, use the tire hook to secure the front tire in place. Ensure the hook is firmly in place to prevent the bike from moving during transit.

**6. Remove Loose Items:** Before boarding the bus, take a moment to remove any loose items or valuables from your bike to prevent them from falling off or being damaged.

**7. Ready to Board:** Once your bike is secure, proceed to board the bus. Always stay aware of your surroundings, and be sure the driver knows you are ready to go.

**8. Prepare to Unload:** As the bus approaches your stop, make yourself visible to the driver. Remind them that you need to unload your bike and exit through the front door.

**9. Unhook and Remove Your Bike:** Lift the tire hook off your bike's front tire and carefully remove your bike from the rack. Be mindful of other bikes on the rack.

**10. Return the Rack:** If there are no other bikes left on the rack, please return the rack to its upright and locked position to ensure the safety of other passengers.

**11. Signal You're Clear:** Once you've safely removed your bike, step away from the bus and return to the curb. Make sure to wave at the driver to let them know you and your bike are clear, allowing the bus to continue safely.

**12. See More:** Scan the QR Code to see more tips on Biking & Riding!
